

Apothecare Dispatch and Delivery Program

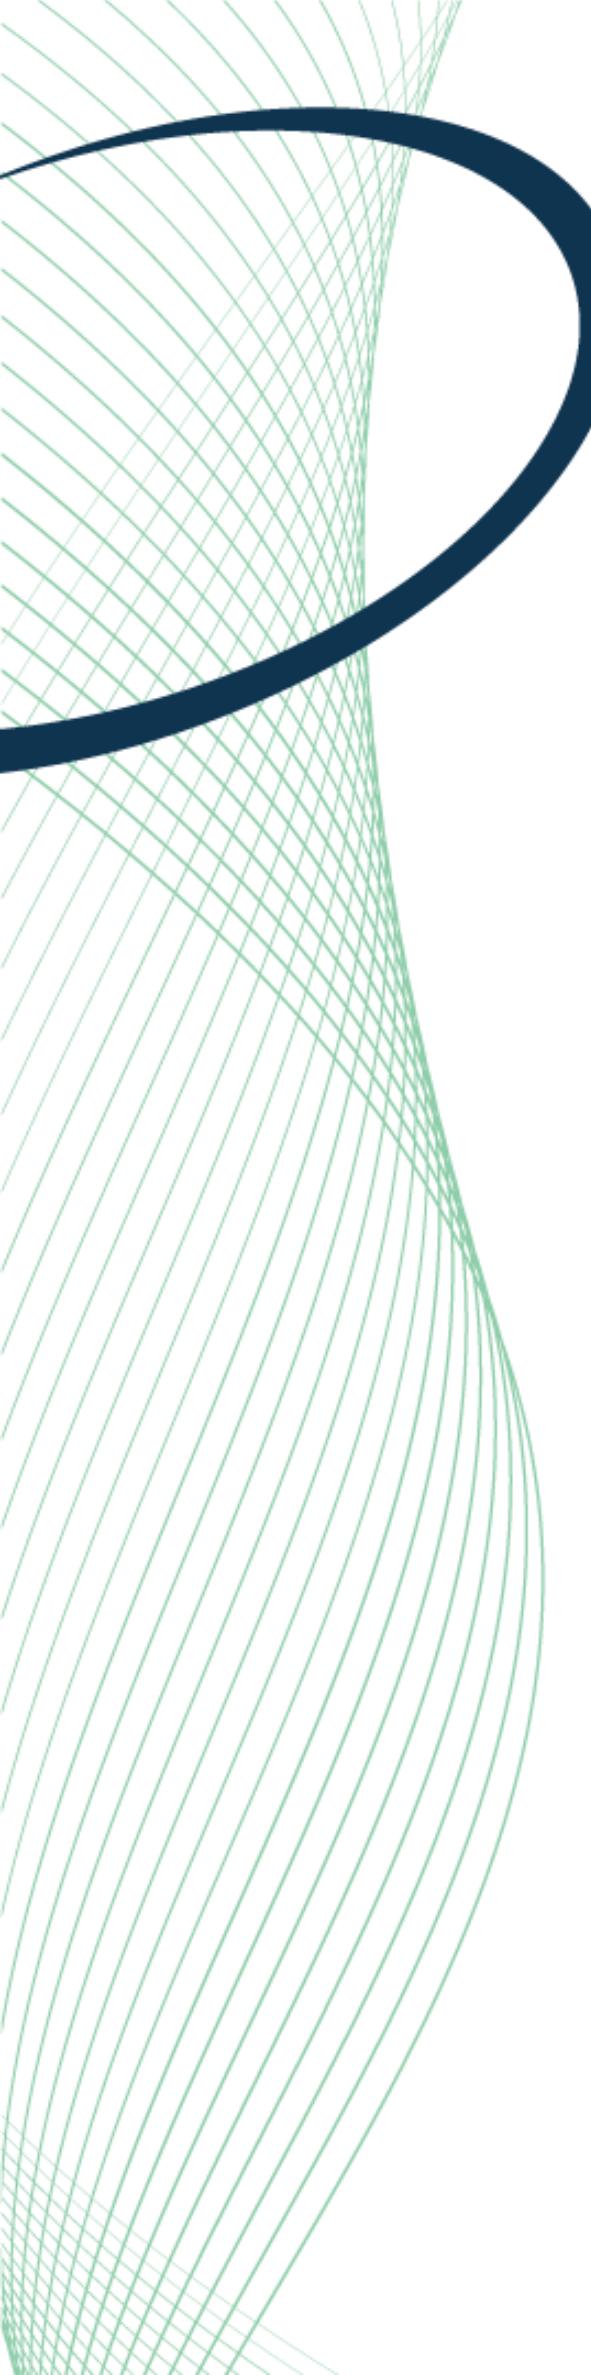

February 8, 2021

Apothecare

Introduction

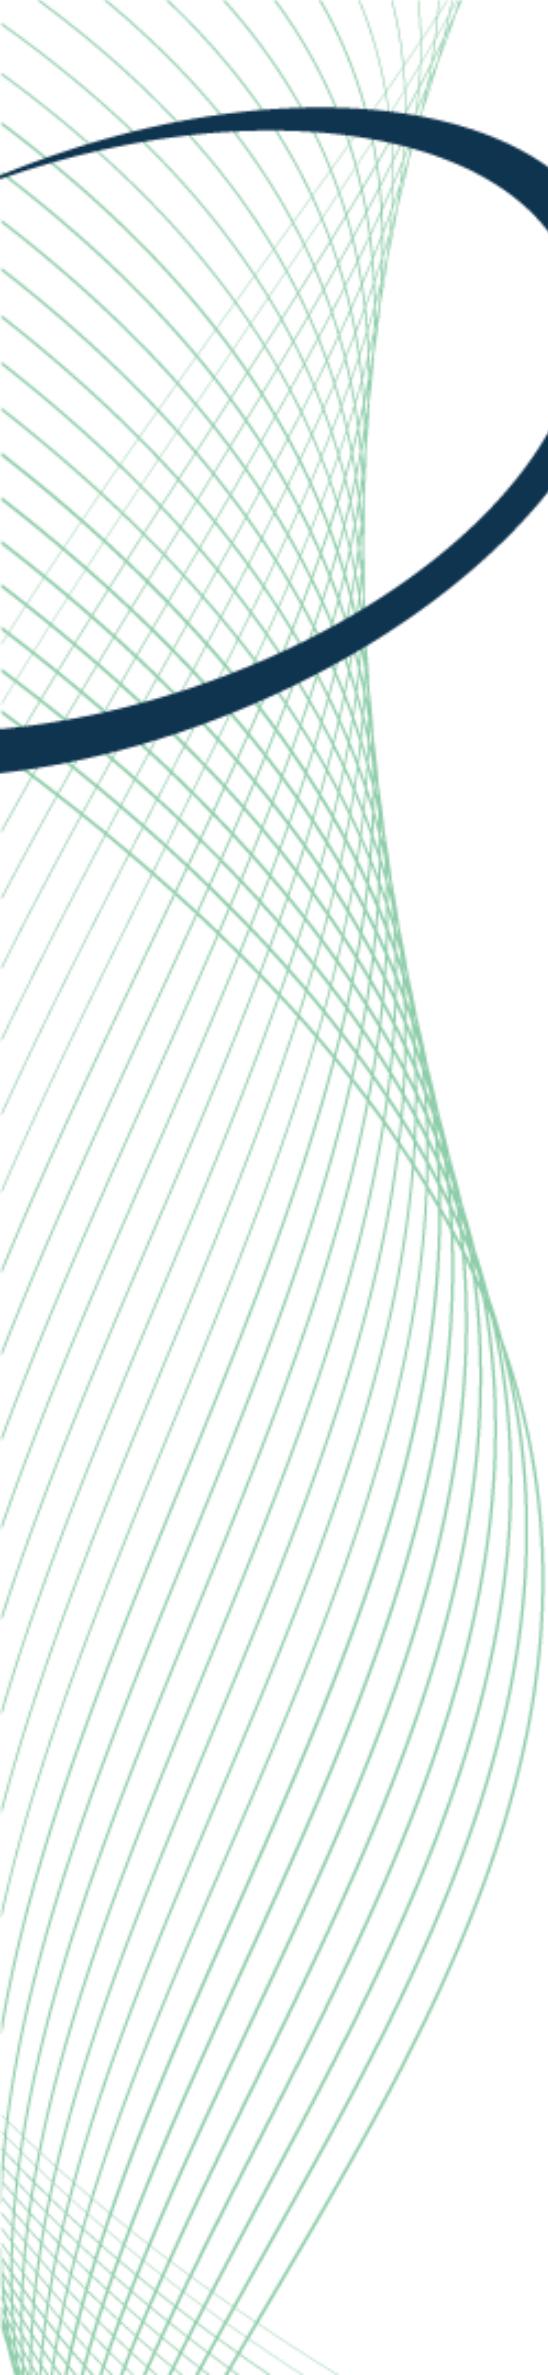

Greetings! My name is Jack McDermott, Transportation Supervisor for Apothecare Pharmacy. I have been working for Apothecare 5 years and I really enjoy the daily satisfaction of delivering our medication to the hundreds of group homes, recovery centers, assisted-living facilities, hospice agencies, and independent living communities across southern New England

Where Do We Start the Delivery Process?

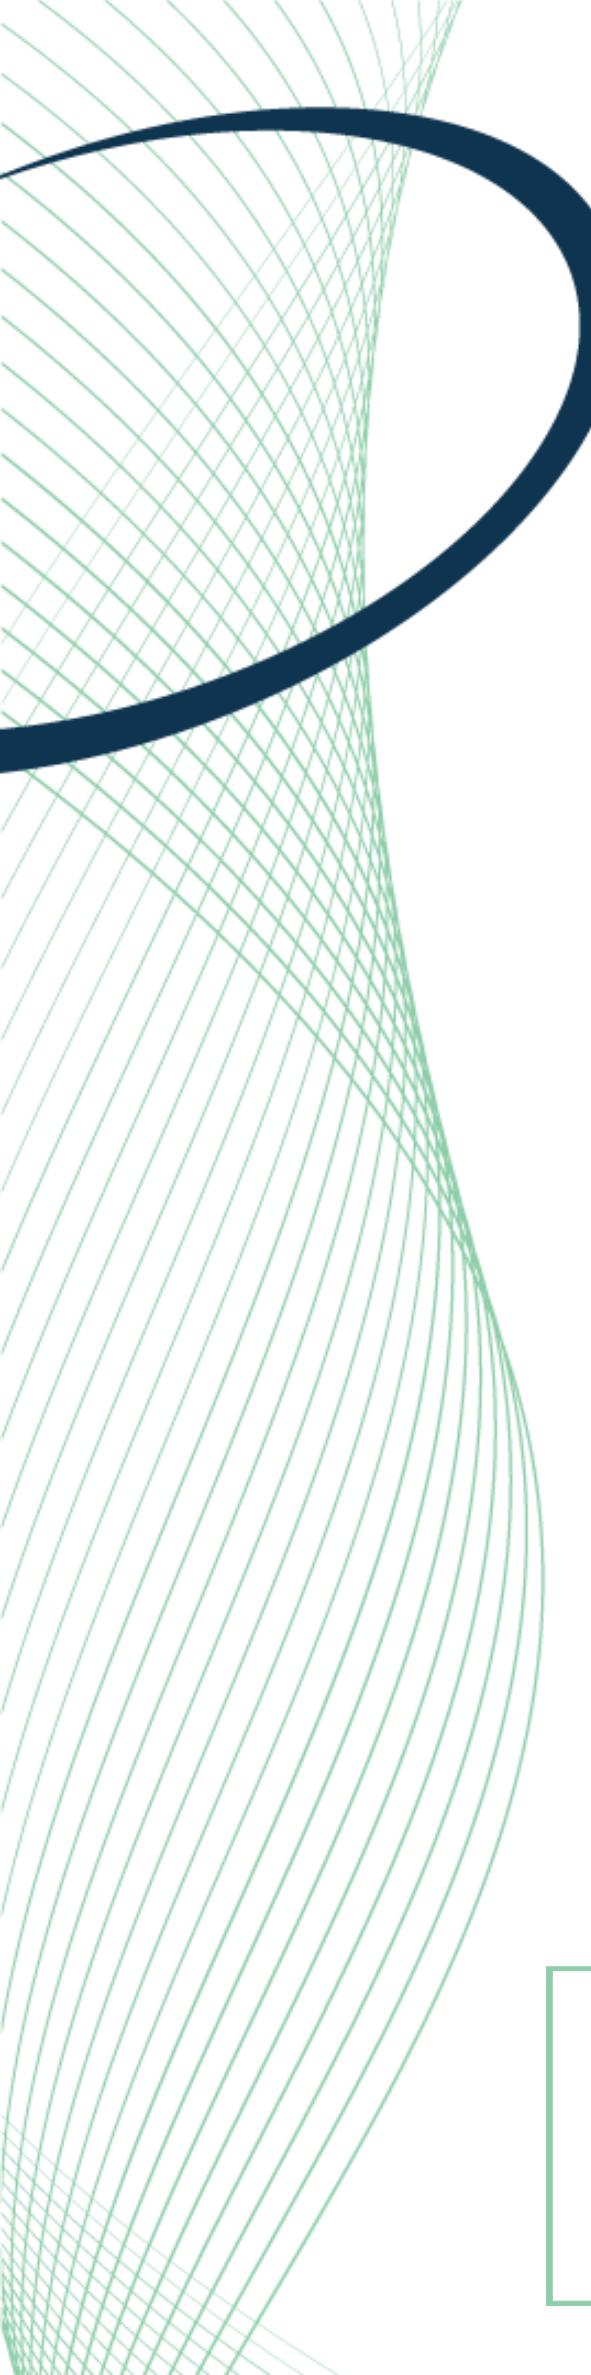

- Apothecare receives approximately 2500 prescription orders a day. We then fill those orders in MedPacks, BlisterPacks, or vials, depending on client preference
- We then bag the packs and/or vials based on address. Each bag has a bar code with the following information: Name, address, telephone number, Scripts enclosed, medications

Technologies We Utilize

Delivery Tracks- As I mentioned before, all of our bags are bar-coded. Thus, when a delivery is made, the Apothecare driver, with his tablet and mobile phone, scans the bar code and enters the name of the person receiving shipment (no contact during Covid). Delivery tracks also counts bags to ensure that all bags are delivered.

FleetMatics- FleetMatics allows me to track exactly where our drivers are located so if a client calls up asking where our drivers are, myself or a member of our team can locate precisely the driver's location and distance from drop off.

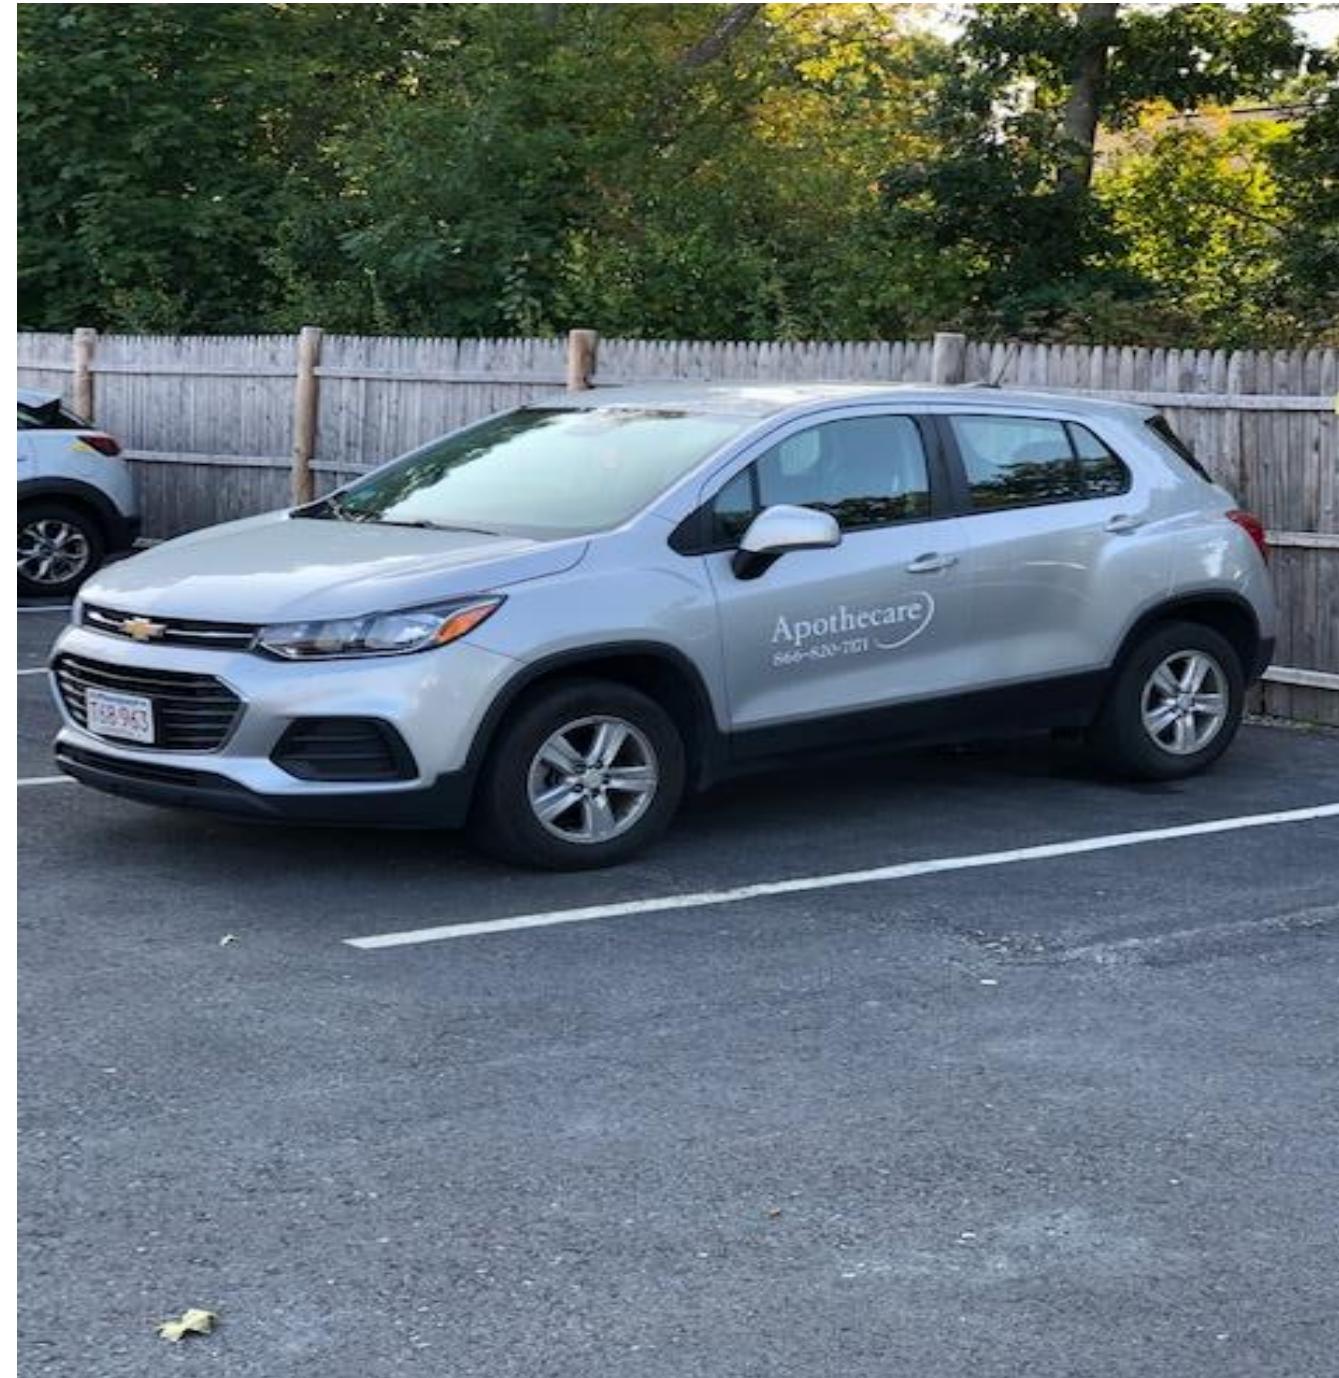

How Often Do We Deliver?

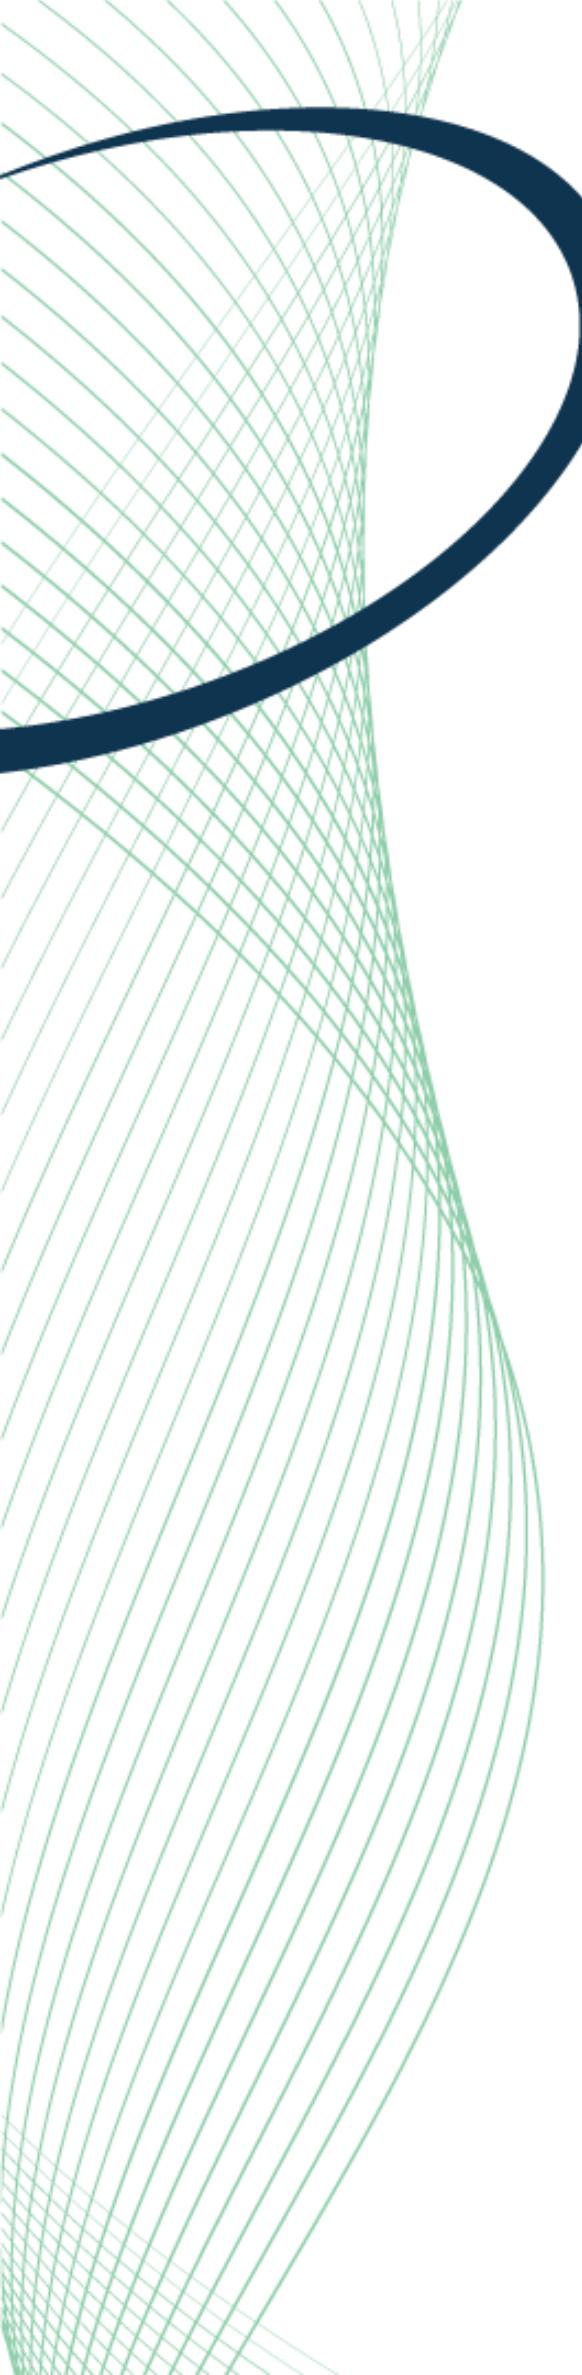

- We have a 2PM and a 6PM daily (Mon-Fri) departure from Apothecare Headquarters. Saturday/Sunday 1 delivery per day
- We ask that orders be placed a minimum of 3 hours prior to departure time to give us time to fill and bag prescription
- Of course, emergency orders do occur, and we respond appropriately

An Apothecare Delivery Car

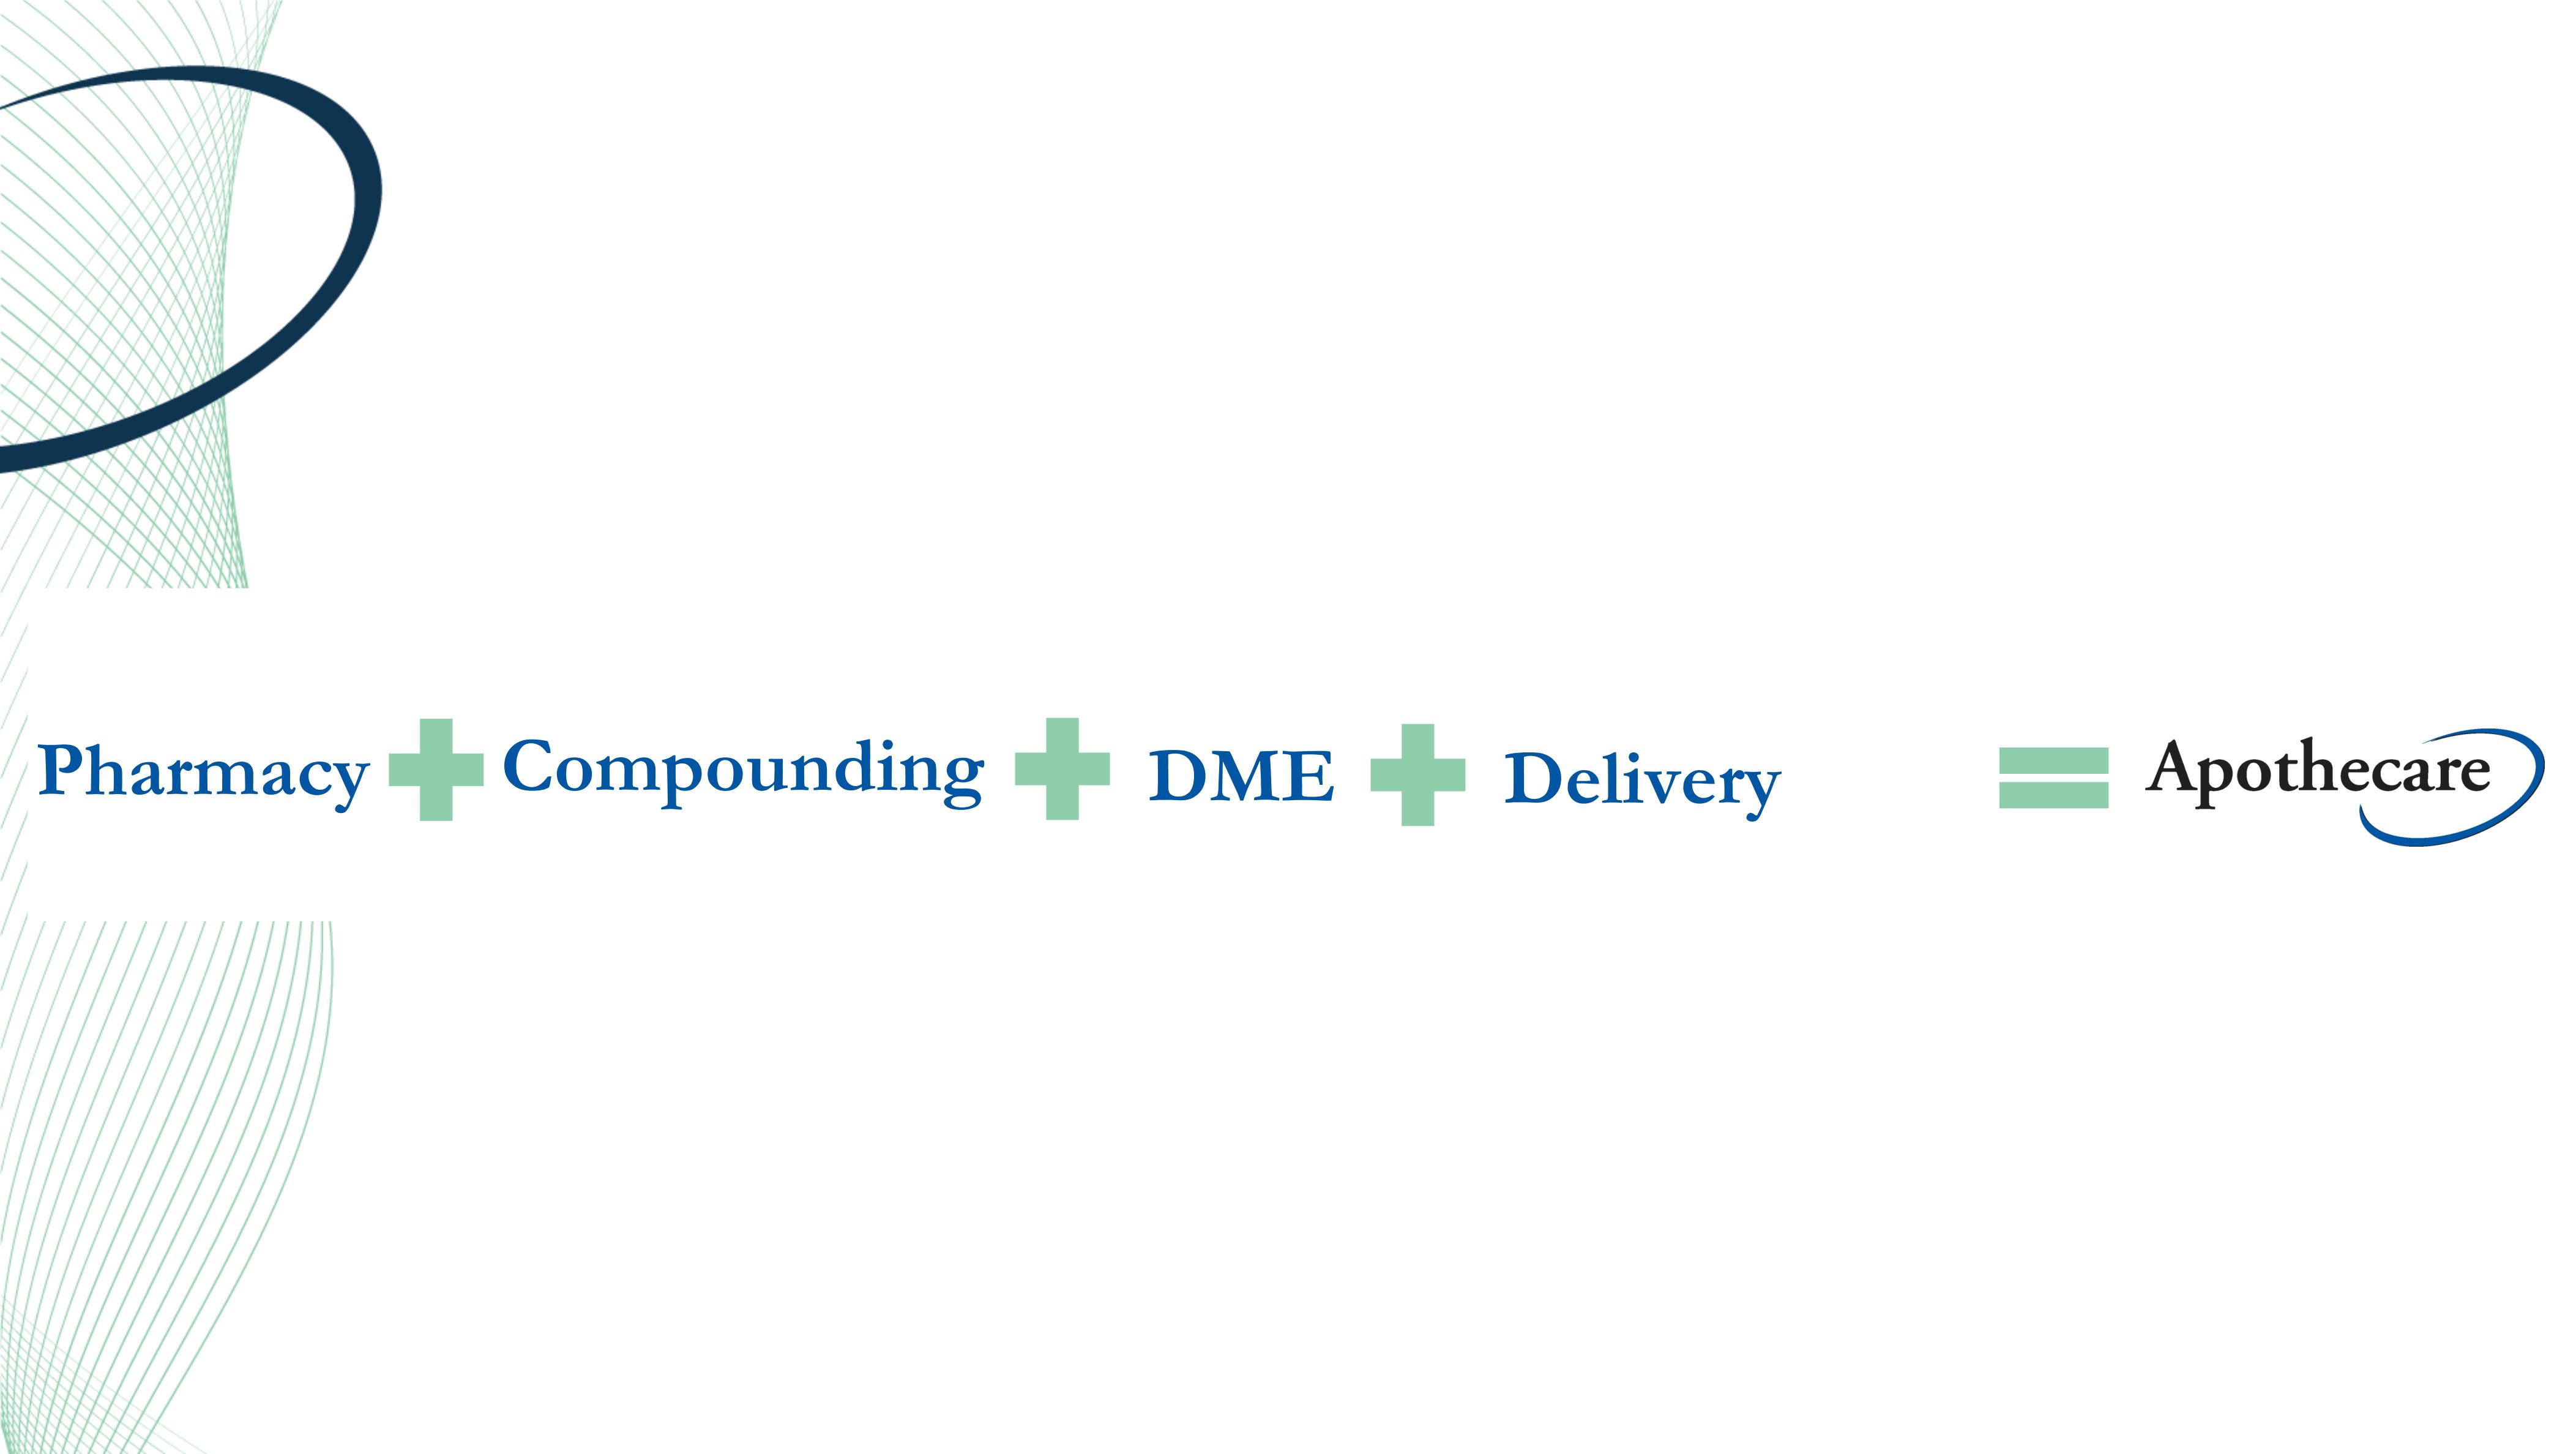

Apothecare Fun Facts:

- We have 28-30 drivers depending on the day
- We deliver 2500 Scripts/Day
- That equals 655,000 Scripts/Year and over 18M pills/Year

Pharmacy + Compounding + DME + Delivery

= Apothecare

Thank you!
